[14th International Symposium on Aquatic Plants](#) [2]

14 Sep 2015 to 18 Sep 2015

Edinburgh, Scotland

Matthew O'Hare

moha@ceh.ac.uk [3]

The 14th International Symposium on Aquatic Plants has been announced to take place at the [Playfair Library](#) [4] in Old College, Edinburgh between 14-18th September 2015. Registration and abstract submission is open [here](#) [5].

Organised by MARS colleagues at the [Centre for Ecology and Hydrology in Edinburgh](#) [6], the conference aims to: *"promote debate on all issues relating to the science and management of aquatic vegetation. Interest in aquatic plants has been growing and diversifying and to reflect this there will be a wide Scientific Programme which will appeal to scientists and managers."*

The conference programme will include sessions on Ecotoxicology, Trophic Interactions in Macrophyte Beds, The Future of Invasive Species Management, Community Responses to Environmental Change in Space and Time, Aquatic Plants and Physical Processes, Restoration, Aquatic Plant Monitoring, Ecological Stoichiometry and Nutrient Cycling, Vegetation & Dams, and Fundamental Science.

Delegates will also be offered the opportunity to take part in a conference dinner and ceilidh at Surgeon's Hall, and to attend a field excursion to Loch Leven to see an excellent example of successful lake restoration.

Follow the Symposium [website](#) [2], [twitter](#) [7] and the [#aquaticplants15](#) [8] hashtag for updates.
